APHASIA - VOLUME I

Historical Foundations, Neurobiological Aspects, and Clinical Evolution of Language

Ernesto Luis García y García

Foreword by Dr. Pablo Muñoz Sotés

Explore the neurological foundations of language, the different forms of aphasia, and the assessment and evolution of language disorders.

Based on a longitudinal clinical study of **251 patients with aphasia**, originating in a doctoral thesis at the **University of Zaragoza (1991), updated in 2026**.

For healthcare professionals, researchers and students interested in language and rehabilitation.
