of First World Congress of Spiritual Unify in New York**

The biggest Victory of Christianity: THE CAMPAIGN of army Khulagu-Khana on help to Rome

(based on ideas of the report of President RK, professor, Dr econ PhD Nursultan Abishevicha Nazarbaev on YI Astana's economic forum)

We so much love insisting own erroneous opinion which there seem wonderful, as to us manages general to approach the true understanding of things. Elena Prtrovna Blavatskaya, founder in Europe izoterik's tradition, was completely rights noting the man's undesire to move, to come off, to stop to stick to habitual way errors ... That is why, like, only Historic Truth helps to carry out this intellectual effort and open the door in Willing.

And not accidental, THE HISTORY of Petr Lavrovich Laurel, the third thinker of Humanity ambassador Aristotelya and Gegelya, considered most important and all by determining behavior's science, on which is based all hardest construction of humanitarian knowledge. It is name, that is why history frequently aimed unequivocal to deform absolving and substantiating own pretensions and claims. And not only Emperors and Great Princes, but and entire Knight's Ordens and pretension's successors of aristocratic arrogance and «wide world claims on power» in dinky hereditary farms.

But interesting - why many people in Europe nothing and in XXI st. do not want to know about the real history of East and as-that linger to express deep and sincere acknowledgment to The knights of Christianity to and martyrs for Faith of Musulmaniskuiu which actually saved Christian World in 1256-1260 years, and likely and all our civilization?

But was saved not only Christian World but also World outlook balance between the progeny of two leading world religions - Christianity and Musulmanstva. The organics development of Global processes without this understanding will be today sooner exception, than rule.

To ignore these stages of the spiritual growth of humanity unreasonable. Because Souls Sincere Beleivings giving lives for triumph self innovation in the modern civilization of world outlook - Christian wait the grateful Memory of saved offsprings and progeny.

The XX century of us taught to bewail for all killed in bloody conflicts - and on the part of victors and on the part of losing. All World notes 8 and 9 May, as Days of General Sorrow about it is abortive lost lives during Second World War. To us already became till pain comprehensible, what loss of every human life - this great deprivation which it is impossible to acquit of moral plan by neither circumstances. That is why we and manifest basis of wisdom and ask assuagements at superior forces (GOD) for all it is abortive ... Name, same deep and realized approach is necessary to us by everything to manifest and to killed men 3 September 1260 yr. near Nazareth (it is great symbol for Christians !)

Odd, but also now, even in Euro-Asia oriented publications it is said only about complete Defeat Mongol's troops Khulagu-Khana from Christian-veterans at Ain-Djaluda, nearby from Nazareth, 3 September 1260 year.

Let's consider this historic event under a few another corner of vision and by asked following question: «A had whether moral right Christian Mongol's Army to conquer Army Musulmans of Beibarsa and Kuttuza even in that - very complex and imperfect time? Are the war as Holy Bible to permissible? »

No, INADMISSIBLE! But this conclusion was made only in XYII st. researcher Viklefom, and in 1200 year of such Christian's researches else was not.

And was very complex for Rome situation, when gold flowed by river on contents Knight's Ordens to Palestine which delineated entirely bearable situation before Daddy in the most black paints, in order gold brooklet to them from Rome not stopped, and where and by what price was got this gold for Christian Orden in Palestine, already felling the comfort of wealth, the Tamlierov - did not interest.

Amorality, spiritually dropping Tamplierov and killed sincere Christian from Great Steppe. And began everything from little unwines of fraud («little unwines of fraud» does not spend time!), when «Composition» about difficulties and unendurable hardships for Christian in Jerusalem began to give Apostolical Rome. And then small fraud have made in Large and Myth about Savage Mongol Soldiers which it is irresponsible repeated everywhere in Europe over centuries. This myth came and to Russia, as historic European truth, but today nevertheless reside scientists who try to combat him by consequences and restore real history.

It is however, at the beginning 13 centuries Rome did not see the possibilities of the conservation of Christianity even in Europe without help on the part of Great Tatar (at my place formed sensation, as this idea, as absolutely unenforceable prompted Tampliers to Rome fixing on decades their reign in Palestine of and virtual submission Rome to their demands). That is why and went embassy from Rome in Karakorum. And managed to transmit wife Khulagu-Khana, kereitke Dokuz-Khamum, Christian o and protectress Christians, as well as to the chief of headquarters najman Kit-book-najon, zealous Nestorian, real and best deep worry for willing of Christianity which embraced at the time Rome due to double-tongued information Tamplierov.

And happened for Tamplierov impossible - despite the differences of cultures and even distinguishing in basic life traditions, East (Euro-Asia) was lifted on the protection of Europe(!).

Yes and as was lifted! The saving for Europe Campaign qualified more, than capitally and professional.

Mongols not only carefully studied situation but also planned campaign to Palestine. And in order to retain pristine pastures, cattle breeders population asked to go away from the route of army, through rivers have made boat-bridge, prepared food reserves and caused from China the 1000 of specialist ins projectile machines.

Were even studied questions about support allies and by the representatives of general faith these great as to the scales of military measure. It is so, Armenian Patriarch blessed Khana on Holy War, and King Small Armenia (Cilicia) Getum I and his daughter's husband, Antiohskiy prince Boemund VI, adjoined its troops to Mongol. This opened Mongols way in Syria.

That is why by the end of 1257 yr. Mongol Army liquidated all fortresses of Islam-men in Iran and in February 1258 yr. occupied Bagdad. Known, what Khan even have made present Nestorian's Patriarh the palace of Haliph for the residence device. This, as write historians - «Turned to him of hearts of Armenians and Syria-men». All right and then, as general, begin in their descriptions of emotion and the misspelled interpretation of facts. It is so, Armenian historian Kirakos without pangs of conscience writes that Christians «suffered under yoke Musclemen 647 years». But if they, real, so long «suffered under yoke Musclemen» that would not remain « hearts neither Armenians, neither Syria-men», turned to Khanu after the gift of the palace of Haliph to Nestorian's Patriarh (!). «Everything deform» emotions at Armenian historian, «everything deform» and deform real events, That is why He from the rank of historians, as to-finding opinion, should be transferred in simple writer, as is spoken - on eternal stay, to in order nobody was not interesting without grounds to blacken representatives other religious views.

Very slowly moved Freeing Europe Mongol's Army Khulagu-Khana beginning with the first days of campaign, when only in January 1256 yr. army passed on left shore Amudari. And, how are You think - Why?

Why not was of shining quick transitions (of sample 1222-1223 yrr. as to example Subedeya through Caucasus in rear Polovetsk's Khana ? Any military will appreciate, as blazing defeat tactics slow progression the shifts of troops in the designed plan of campaign. What of this did not understand the chiefs of ten 1000s of soldiers and even chief of the headquarters of Great Empire? What wanted to attain from West Kit-booka-najon, by years overcoming distances which previously were overcome for few dozens days? By much theres seem, to answer this question today already impossible ... (though, like, only through these a few hundreds of years old to us manage to understand that main whirlwind of ideas and emotions which was in consciousness Great Christian Soldiers from Mongol's steppes).

What caused Khulagu-Khana to linger with progression westward?

Conscience, yes inner uncertainty in the accuracy of chosen way limited initiative Great Christian Soldiers. They well remembered behest Chingiz-Khana and disputations Musclemen's and Christians which conducted The Great Founder of Empire. They remembered Musclemen's Temples Karakoruma. They remembered the sincerity of the faith of representatives all Religions and understood that neither Musclemen's, neither Christians are not enemies only that is why, what go in different Temples. But necessary was to help Rome to save Christianity and DEBT conducted Great Army westward, all Knights of Christianity - the veterans of Mongol's battles.

And what could be DEBT before far Rome? Sincere feeling to save of Brothers as to Faith - Christian Europe (!), that is why and called Christian ethnic Lev Nikolaevich Gumilev. Why not are written novels on this topic, because this very rare the ambassador of birth Christa the case of collective self alms in the cause IDEA, in the cause Willing, of in the cause real accelerated Innovation development? What inner mechanisms of the consciousness of nations curbed and curb us from unilateral apotheoses act of bravery Soldiers Great Empire? It is like, what give no Kit-book-najon to carry out very quick the conquest of all countries till Damascus.

Such sensation which wanted to the organizers of campaign what-that not of the military deciding of this opposition between Christians and Musclemen. Where those at the bottom of the heart they, like, hoped that during unpressing transitions and the soft augmentation of the positions of Christianity in the east is found deciding bloated Tampliers before Rome the conflict.

But deciding did not come ... and the nobody of him did not prompt, and self fact the motions of Great Army were began motion «tectonic plates religious consciousness» at many nations which too at the bottom of the heart did not understand, did not want to internalize the errors of generators religious wars. And they as-that intuitively (actually professing international common to all mankind values), but very seriously and bravely rebelled against always conquering Army which went to Conquer Faith, at the time well perceived by the nations of East – Musclemen's Faith.

And, as redeeming The Rome fault for search waiver of not by the military solution procedures of bloated Tamplierami religious conflict, have rebelled of Christians Caucasus (!). Nobody meanwhile so did not look at rebelling Gruzins, and from positions Soldiers Great Steppe in XXI century slips in regret about what insurrection in Georgia held up Mongol Army. Yes and as could will not rebel on Caucasus, when felt ideological weakness its recent conquerors (as a rule, Truth always till this Holy Campaign was on the side of The founders of Empire) and even possibility to take victory in the support of aboriginal enemies Mongols Polovetsk-men who at the time already owned Egypt of and them named Mamluks. Actually we in the analysis of events 13 centuries see the true basic ideas of the-foundation of the birth of Empires - the creation of conditions for progress and the developments of Humanity. They passing through purposes and the desires of people and the consciousness of outstanding persons, create Great History.

It is correct, from the positions of strategists military science, certain, set-back approached military defeat. But we are unable to from these positions to estimate, name, with purely military to consider religious wars, especial, in XXI century (!). World outlook by weapon is not conquered (!). And the sacrifices of in the cause the faith only of her enchance and give no nation to change to behests and the faith of primogenitors. Example Old-Christians (Kirzhakov) on Russia more than convincing and meanwhile to the end not understood, and already necessary and this act of bravery Christian to realize and to appreciate. Committing and committing this spiritual act of bravery of person something very important and very persistently want to us by everything to say ... from something to warn and something fundamental to correct (!) in the Christianity perception on Russia.

AND Christians of Caucasus did not want to support Mongol military religious campaign, when Christianity, as «Alone true Religion» (from the position of Christian Europe) should be finally all to Conquer (!). All TO CONQUER, and for What ?

Because Chingiz-Khan in His Army did not aim at prevalence any one Faith? But as was observing the behests of The founder of Empire, to help Rome which, as was cleared up only in decades, sincerely then was cheated in the assessment of hazard (to costly humanity is bided pass double-tongued information ...)?

That is why could not «People long Will» refuse in help to the brothers as to faith understanding Mind and Heart the necessity of Christianity for Humanity, but also to conquer «religious enemy» did not scurry, and as a result so slowly went Great Freeing Army curbed by the consciousness of unmilitary aspects decided problems.

Inner struggle and the search of truth, is considered many Europeans by peculiarity thinking and investigating the depths of Soil Europe. But in this Great Campaign, as in self objective historic mirror the eminent results of spiritual search and conflict between debt, traditions and feeling of the justice of 1000s Christian Eurasia (!). The tension of inner struggle was so much high, what was ignored the military experience of shining victories (!) and grew understanding of the fallaciousness of the military deciding of Religious problems. And this the most great was manifested 3 September 1260 yr. nearby from Nazareth. On rub centuries historic practice outstripped theorists-religious having shown fallaciousness the military deciding of religious problems (after such «historical example» Viklef could not make of other conclusions).

Tamplieri even wanted to go in its treachery to the end and to come forward on the side of army Musclemen of Beibarsa and Kuttuza. If would not Magister Tevtonsk's Orden, then even difficult to present in order began in Christian Evrope ..., when ambassador multiple serving meses as to all Europe for the victory of Mongol Army over couple of years, when all West Europe to glad victories East Christians and compared Khulagu and Dokuz-Khatun with Konstantin and by Elena (because in their honor served mesas), suddenly of Christians Europe would learn about common struggle Tamplierov against Mongol's Army along with Moslem's Army.

It is certain, today we understand that in those circumstances not with weapon in hands necessary was to come forward Tamplieram and with cross and repentance in the distortion of true state of the art in Palestine before Rome. And this necessary was to make very quick having sent its delegates and to Beibarsu and to Kit-book-najonu. Battle, and or rather collective sacrifice it is possible was to stop having retained the 1000s of lives of Moslem and the

Christians-veterans of Mongol's Army. Was not found person at the level Cossack-Gotha Ataman Ploskyni (Priazove, 1223 yr.) among Tamplierov and was not found persons to think, repentance and to arrange embassies. Mongols turn horses have not horses yet till Nazareth, just like should be to occur that at the bottom of the heart, like, wanted Incorporated by iron discipline Soldiers-Christians Great Empire.

Because actually were come off in this Fight losing in 1223 yr. Polovetsk-men with its victors Mongols through 37 years old, and this very short as to historic yardsticks term, in order to forget and do not want to revenge. It is that is why, battle had only exterior capsule Religion, and essentially was the continuation of dispute on the part of Mamluk-Polovetsks for leadership in steppes, but only under Nazareth.

But low feelings, avarice and the treachery of ideals generally go by row and to redeem caused by the carriers of these qualities harm, general, it is necessary to already moral people. Such scale death Christians and Moslems shook manifested and subtle world. On all levels of universe all at once was realized no-assume the disorders of religions the variety of Wide World, of deep no-right the military deciding of religion questions, and main - the necessity of moral purify Christian Europe.

And very unilaterally writes about these events Armenian «writer»-historian Kirakos estimating Mongol's Soldiers only thus: «Enthusiastic by zeal, they went forward trusting its force and bravery». Never Great Army mistrust only «force and bravery». Practically all victories were achieved by mind and calculation, as today would say - by intellect. It is certain, they pulsated to the end, but wonderfully to 1260 yr. understood all ambiguity of this war, that is why and neglected intelligence service. And does not leave impression at not unilateral explorer which Soldiers Great Empire in this Campaign «got tired to conquer». It is on, have saw before by its eyes Polovetsk-men of Beibarsa, like, was recalled forgotten antagonism, yes and that not such all crushing, as in old times. Great deal understood in these «slow religious war» Mongol's Soldiers-veterans.

And they nevertheless had time to retain and to change Wide World, when under Nazareth really in manifested world committed act of bravery Christa (!) and actually fetched itself in sacrifice (!), in order Europe could to find in itself forces to commit moral revival.

French king and Roman Daddy purified Christian World from immoral speculators and traitors having arranged with 1307 yr. as to 1313yr. rigid, with very distinct tasks process Tamplierov accused in worship Bafometu, desecration holy and in the multitude of other sins. It is certain, Tamplieri wine itself did not want to acknowledge, though, apparent, well understood - for what them punish.

That's why today in the world 1.2 bn. Rimo-Catholics and 1.5 bn. Christian, but not far and away less and supporters Moslems (!). And this is CORRECT! Do not conquer Faith by weapon and is not fixed Its in the consciousness of people by violence. That is why and do not lose the appealing ness of doctrine which have general object - The rescue OF HUMANITY.

And we are obligated to retain Memory about it Spiritual Act of bravery and, in the first place, to apply with Prayer, The Christian Prayer to accept in best world Soul all killed under The Nazareth 3 September 1260 year.

It is second, similarly made by us to proposal as to the project of Memorial to the sacrifices of tragedy 2001 yr. in New York, to create on the spot battles Monument on the money of progeny two leading religions - Christian and Moslem. But donations should be not above 10 dollars from everybody Christian and Moslem, of and books lists all donors to preserve in Nazareth (their copy, like, exist sense to transmit as to temples, in order beleiving before prayer could find itself or her dependents in this principal for people historic document).

It is third, to prepare fitting publications of the relatively historic significance of the events 3 September 1260 yr. under Nazareth for Christian Europe. And main - not the volume of promulgation, and qualitative understanding translation into European languages and possibility with them will get acquainted in the facilities of mass-scale information.

It is also advisable to prepare scientifically-practical conference on events, of 3 September 1260 year under Nazareth, to arranging which to attract leading universities of Europe and Americas.

This will help to embark upon the change of perception христиан Asia in the most of the countries of Europe, and main - to the revival of the more active tradition of Christianity in countries Central and Southeastern Asia.

Because the off springs of Mongol-veterans live in all countries of Asia today and many of them a few forgot - for what died their primogenitors, all the more, what meanwhile about their Act of bravery nobody and did not recall.

To but people want to belong in historic events, that is why Memory about the events 3 September 1260 yr. will help 1000s, to and possibly and dozens the 1000s of people to perceive itself descendants Great People, and this without doubt positive.
